EDUCATION

University of KwaZulu-Natal

Bachelor of Science in Computer Science and Information Technology

SKILLS SUMMARY

Languages: C#, C++, SQL, Python, HTML5, CSS, JavaScript, Java

Framework: .NET

Tools: Microsoft SQL, Database Management, Git

Soft Skills: Problem Solving, Leadership, Strong Communication

WORK EXPERIENCE

Full Stack Development (CAPACITI)

December 2024– Present

- Building full stack applications using HTML, CSS, JavaScript, Python, Django, and RESTful APIs.
- Gaining experience in database management with SQL real-world project collaboration.

Tutor – COMP201 Data Structures (University of KwaZulu-Natal)

August 2023- Nov 2023

- Mentored second-year students in mastering data structures (linked lists, trees, and graphs) using Java, while assisting with debugging, code optimization, and enhancing understanding of algorithms and best practices.
-

PROJECTS SUMMARY

Cylinder Head Doctor API | [LINK](#)

- Developed a Web API using ASP.NET Core to manage customer data, services, and payments for a car cylinder head business, with efficient CRUD operations and input validation.
- Designed database interactions with Entity Framework Core, ensuring data consistency and seamless relationship management.

Student Registration System (University Group Project)

- Designed and developed a client-server-based student registration system using .NET and C#, with integrated database management using Microsoft SQL.
 - Led the team in connecting the database management system with C# for seamless data exchange and project delivery.
-

CERTIFICATES

C# Fundamental (Coddy) | [CERTIFICATE](#)
